

BACK FOR 2021!

Earn School Incentives for Wellness Program Participation!

ACSHIC Wellness 2021 School Incentive

The school incentive is back for 2021! This year, with increased participation in the 2021 wellness rewards program, you can earn **higher incentives for your school and more opportunities to be rewarded.**

By participating in the wellness rewards program, your employees not only earn rewards, but are educated about wellness and how to make lifestyle changes to reduce risk for health conditions, encouraged to take preventive measures to help prevent conditions before they become costly and difficult to treat, and more. Be sure to continually promote and encourage employees to participate in the 2021 wellness rewards program and earn incentives for your school!

Here's how the incentives work:

The incentive program is designed to reward increased participation through a tiered schedule as follows:

- Schools that achieve 20%+ participation in the wellness program will receive 50% of the eligible funds
- Schools that achieve 30%+ participation in the wellness program will receive 75% of the eligible funds
- Schools that achieve 40%+ participation in the wellness program will receive 100% of the eligible funds

*When a milestone of 20%, 30%, or 40% of completers is achieved, the school qualifies respectively for 50%, 75%, or 100% of eligible funds to the school. The school's eligible funds will be \$60 per completer once a milestone percentage is achieved and will be calculated as the milestone headcount of completers multiplied by the eligible percentage of \$60 per completer. **Each milestone achievement earns the school a higher reward!***

Here's an example:

School has 500 persons on the medical plan; 20% completers is 100, 30% completers is 150, 40% completers is 200.

- **If 20%+ completers are achieved, the school will earn 50% of eligible funds: earns \$3,000 (100 x \$30).**
- **If 30%+ completers are achieved, the school will earn 75% of eligible funds: earns \$6,750 (150 x \$45).**
- **If 40% or more completers are achieved, the school will earn 100% of eligible funds: earns \$12,000 (200 x \$60).**

School Incentive funds distributed must be used by the school only for wellness related purposes to benefit employees. Funds are not to be used for mandated/compliance costs, example: AEDs, etc.
