

ACSHIC Members: Book your 2020 Flu Shot Clinic today!

The Giant Eagle Pharmacy Flu Vaccination Program is built around your workplace needs and offers flexible scheduling and custom pricing. We offer flu shots and other vaccinations such as Pneumonia, Shingrix, Hep A & B and more that can be administered at your clinic.

flexibility

We come to you – Vaccinations are given at your school location by local, licensed Giant Eagle Pharmacists. Flu clinics can also take place in an outside tented area* if access to the school is limited.

*The school district will be responsible for providing the tent, setting up and tearing down the tented area and obtaining any local/bureau licensing or permit approvals.

Children's flu shots – School aged children 9 years and older can receive a flu vaccination on the day of the clinic with the presence of their parent or guardian.

Minimal wait time – We schedule one Pharmacist for every 25 employees to be vaccinated so wait time and lost work time are minimized.

Convenient scheduling – We work with you to schedule a clinic date that meets your company workload and time frame.

custom pricing

Volume discounts – We offer your company reduced pricing based on the number of employees to be vaccinated.

Insurance billing** – We accept and are able to bill most major pharmacy benefit plans and some medical plans along with Medicare Part B.

**Clients are encouraged to contact their health plan to learn if the flu vaccination will be covered at Giant Eagle Pharmacy.

Employee cost-sharing – You can opt to have your employees pay a flat fee towards vaccination costs and your company would cover the balance.

vaccination voucher program

We know that not every employee will be able to attend the clinic. Our voucher program enables your employees to get flu shots at their convenience at their neighborhood Giant Eagle Pharmacy.

Clinics begin in September to head off flu season, so plan ahead to book your date. In light of COVID-19, we will be following the recommended CDC guidelines which include social distancing, wearing a face covering and screening your employees prior to the vaccination.
